

## **Assure A Smile Promotes Awareness for ‘Biocompatible Dentistry’**

*Miami dental practice spreads awareness for ‘biocompatible dentistry,’ urging South Florida residents to think of how certain dental materials can have an adverse impact on health.*

Miami, FL ([PRWEB](#)) August 13, 2013 -- [Assure A Smile](#) urges South Florida residents to “think holistically” when seeking dental treatment, paying close attention to how certain dental materials can impact health. This fall, the practice is educating patients on the concept of biocompatible dentistry, an application of oral healthcare that focuses on using only safe, non-toxic dental materials that promote total body wellness.

“Traditional dentists still use certain materials that are known to cause serious illness,” explains Dr. Theodore Herrmann, Assure A Smile founder and lead dentist. “The most dangerous of those materials is dental amalgam (silver fillings), which contains high concentrations of mercury.”

In growing numbers, families are turning to holistic dental practices like Assure A Smile for their expertise in both identifying and eliminating exposure to harmful toxins. Demand for this “patient-focused” approach has grown in recent years, thanks largely to the coverage mainstream media has given to such topics.

Most noteworthy, the Dr. Oz Show exposed the severe health risks associated with dental amalgam in a national segment titled “Toxic Teeth: Are Mercury Fillings Making You Sick?” Other news outlets followed suit, spreading awareness for the dangerous nature of the mercury-rich restorative material that many traditional dentists still use today, despite mercury being a known neurotoxin.

At Assure A Smile, biocompatible dentistry is just one part of the practice’s unparalleled commitment to patient health. As Miami’s leading holistic dental practice, Assure A Smile takes a unique approach to oral healthcare that views the teeth and gums as an integral part of the much larger body system. Attentive care is given to all patient needs, including safe mercury filling removal/replacement, TMJ/bite alignment, nutrition, drug-free homeopathic remedies, and ongoing patient education.

### **Assure A Smile**

For more than 25 years, Assure A Smile has been South Florida’s most trusted provider of holistic dental services and a leading contributor to the Mercury Free Dentistry Movement. This month, South Florida residents are invited to visit [AssureASmile.com](#) to learn more about holistic dentistry and the health benefits of biocompatible dental materials.

In addition to safe mercury filling removal and replacement, Assure A Smile is pleased to offer a special promotion on biocompatible dental implants, starting at just \$1,895. For additional information, please call 305-274-0047.
